Description

Details

AIREX® Professional Therapy and Exercise Mats are made of closed-cell foam which will not bottom out or absorb fluids or moisture. They provide a safe and comfortable base and may be rolled up for storage or transportation. These mats are sanitized to inhibit the growth of fungus and bacteria. Use the Coronella mat for personal use on hard floors, the Corona is ideal for clinics where a therapist and patient may be working together, and the Hercules is a great choice when maximum cushioning is desired.
